**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a method for ameliorating the symptoms of a bone or cartilage disorder.
- II. Claims 12-21, drawn to a method of increasing levels of collagen in an individual.
- III. Claims 22-26, drawn to a method of reversing the weakening of bone due to a reduction in mechanical stress.
- IV. Claims 27-31, drawn to a method of decreasing insulin resistance.
- V. Claims 32-35 and 65-68, drawn to a method for treating a disease secondary to coronary vascular disease or for promoting cardiovascular health in an individual.
- VI. Claims 36-39, drawn to a method for stabilizing hormone levels for improvement of metabolic function.
- VII. Claims 40-49, drawn to a method for increasing nitric oxide production in an individual or for treating a disorder caused by or exacerbated by reduced levels of nitric oxide.
- VIII. Claims 50-54, drawn to a method for reducing the concentration of a marker for bone resorption in the tissue of an individual.
- VIX. Claims 55-59, drawn to a method for decreasing the concentration of a marker for bone formation.
- X. Claims 60-64, drawn to a method for reducing markers of poor cardiovascular health.

Art Unit: 1614

Should Applicants elect a Group that would include a disorder encompassed by Group VII, then Group VII will be examined along therewith to the extent it reads on that disorder.

Should Applicants elect Group VII, an election of a specific disorder from those recited in claim 45 is required. Should the elected disorder read on a disorder encompassed by any of the other Groups, that Group will be examined along therewith.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VIX and X are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
